Subject Handout for Tomorrow's WA 1-04 Teleconference

1 attachment

Status November 23.doc

Brian/Reid,

We've made good progress on the dose/risk analysis since our last teleconference, unfortunately the report isn't yet ready to be delivered.

For tomorrow's scheduled teleconference, I've made the attached handout, which contains the ToC and selected sections and tables extracted from the report. I'd like to use this handout as the basis for this part of tomorrow's discussion.

Other items that should be discussed are: 1) the Task 5 report on pond radon releases and 2) the update of the Appendix B cover unit cost.

Will talk with you tomorrow at 11,
Steve
